

WHAT WE DO

The ECO-PCX works in all Major Subordinate Commands (MSC) and Districts across the nation.

The ECO-PCX supports teams performing ecosystem restoration planning by providing:

- Technical expertise & services
- Review plan support & development
- Model selection, review, & certification
- Peer review
- Managing study reviews
- Policy development support
- Training
- Process improvement
- Sharing lessons learned

The ECO-PCX is the lead for planning model certification with a dedicated lead to assist teams with model selection and application, as well as new model development, review, and certification.

When the ECO-PCX serves as the Review Management Organization for decision documents with primary project purpose of aquatic ecosystem restoration.

Each MSC has an assigned account manager. The account managers should be invited to planning charettes, vertical team meetings, and milestone meetings. The account managers also assist in the Review Plan and track project schedules and reviews.

PROFILE

USACE Planning Center of Expertise focused on the aquatic ecosystem restoration mission area.

The ECO-PCX is based in the Mississippi Valley Division and leverages a 100% virtual team staffed from across USACE.
