# DAY 3: EXPLORING SUCCESS AND EXAMPLES ON THE GROUND

Technical Assistance Workshop

Joe Redican  
Planning and Policy, Deputy Chief

Date: 13 July 2023

U.S. ARMY

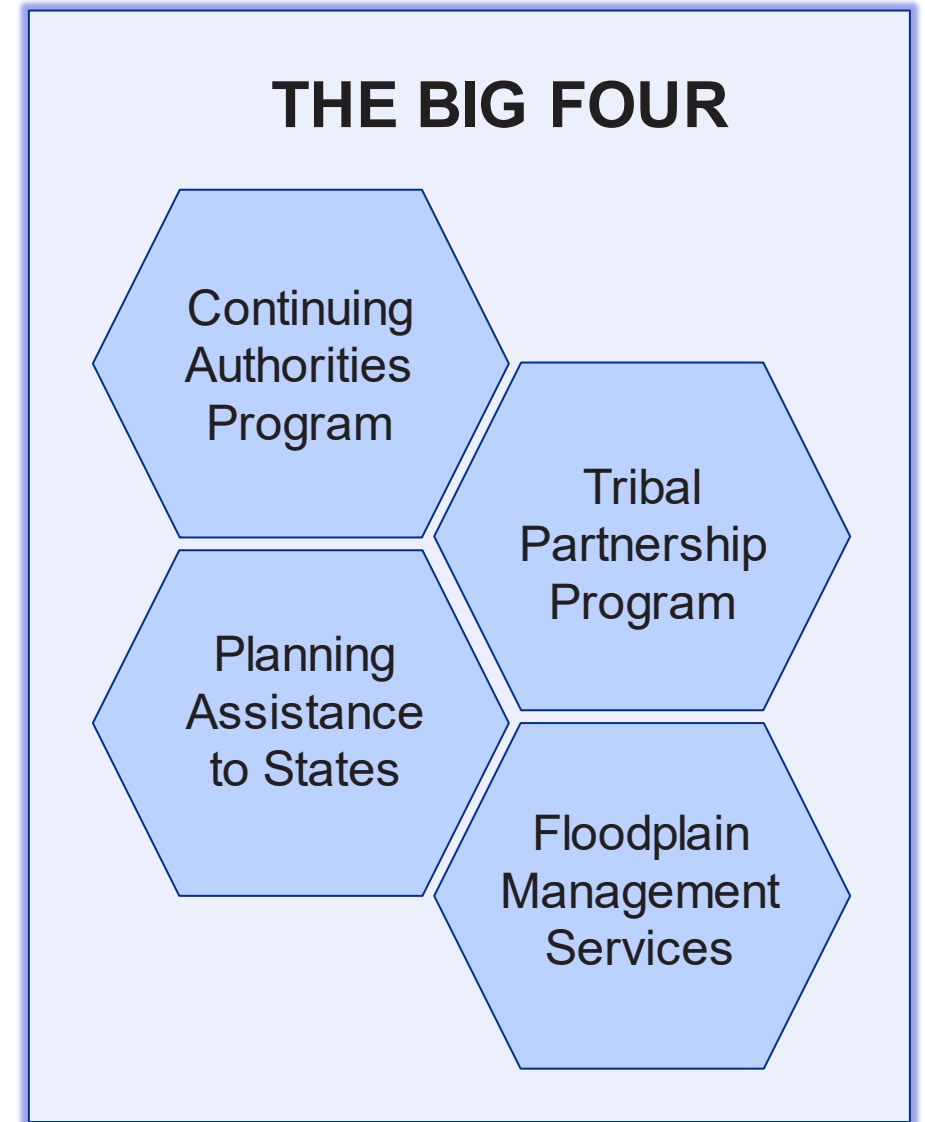

US Army Corps  
of Engineers®

# REMAINING ITEMS & ADMINISTRATION PRIORITIES

- Remaining Item Programs are well positioned to support Administration Priorities
  - Environmental Justice & Justice40
  - Drought Resilience
  - Climate Resilience
  - Incorporating Indigenous Knowledge

# REALIZING SUCCESS

- Outreach and building relationships
- Leveraging internal Corps expertise and resources
- Commitment to delivery
  - Delivery Review with Commanders
  - Management Tools
- Celebrate successes
  - Reporting
  - Justify programs

# WHAT LEADERSHIP SEES: PAS AND FPMS EXECUTION AND MANAGEMENT: KEY ACTIVITIES TO DEMONSTRATE SUCCESS

A Division (LRD) Perspective

Sally Sipperley, Appropriations Manager  
Andrea Carson, Small Programs Planner

July 12, 2023

US Army Corps  
of Engineers®

U.S. ARMY

# PROGRAMS AND POLICY – WORKING TOGETHER

# KEY ACTIVITIES TO DEMONSTRATE SUCCESS

- Ensuring data quality
- Utilizing dashboards
- Communicating to our district POCs

# ENSURING DATA QUALITY

Regarding the Remaining Items 3121 FAS and PFWs accounts, HQ and LRD are both asking for milestones and schedules to support the new and active R projects going forward. LRD will also be providing guidance in the future to support the schedules and milestones.

In addition to the scheduling of funds, the 3 milestones to schedule for the 3121 Remaining Items are:

- CW140 – Start Study
- CW170 – Report Approval (Appendix A)
- CW470 – Project Fiscally Complete

- MG Graham has set priorities in a recent memo dated 23 Jan 25 to include "Finish what we start," so the CW470 is also essential for you to track the fiscal completion of each effort.
- LRD's previous Commander, BG Poetrie also put special emphasis on the Remaining Items programs as well.
- NOTE: The WBS Override Code to use for the milestones is 22000. (As outlined in Appendix A)

LRD has created a Remaining Items template in P2 to assist each district to incorporate best practices to schedule the Remaining Items.

To access the templates in P2, you will query on the Project ID column and then click on Control F and type in LRD, then click on Find Next. This will bring up the LRD templates for you.

The PFW/FAS Study Template is shown, as highlighted below. You will then click on Open.

Once you bring in the template within your new P2 project, you will then ensure there are 3 things scheduled under the Codes tab below in your study regarding the CW140, CW170, and CW470 milestones. The WBS Override code 22000 will already be added from the template, as found in the following screenshot:

General	Status	Resources	Codes	Relationships	Network	Stack	Feedback	WPs & Docs	Expenses	Summary
Activity: 3121-CA (Project: PFW Solution & Eval)										
Activity Code	Code Value	Description								
WBS Code (Override)	22000	FEASIBILITY STUDY								

- The 3 activity codes that are required to use are:
- The Milestones – CW140, CW170, and CW470
  - The Source Appropriation – 096 3121 and appropriate CCs 186 or 251 or 255.
  - WBS Code (Override) = 22000.
- The codes must be on the activity line where the milestone is scheduled.

The screen shot below for #509133 provides an example for the 3 activity codes scheduled correctly for CW470 Milestone, WBS code (Override) 22000, and the Source Appropriation 096 3121 251.

General	Status	Resources	Codes	Relationships	Network	Stack	Feedback	WPs & Docs	Expenses	Summary
Activity: 3121-CA (Project: PFW Solution & Eval)										
Activity Code	Code Value	Description								
Source Appropriation	096 3121 251	096 3121 251 - PFW Solution & Eval								
WBS Code (Override)	22000	22000 - FEASIBILITY STUDY								

- Sent out instructions for adding required Remaining Items milestones

- CW140 – Start Study
- CW170 – Report Approval (Appendix A)
- CW470 – Project Fiscally Complete\*

- To ensure everything shows up on scheduled activity as needed within the tracking systems, **you must have:**

- The Milestones – CW140, CW170, and CW470
- The Source Appropriation – 096 3121 and appropriate CCs 186 or 251 or 255.
- WBS Code (Override) – 22000.

- To assist each district in incorporating best practices to schedule the Remaining Items milestones, we created a Remaining Items template in P2

# UTILIZING DASHBOARDS

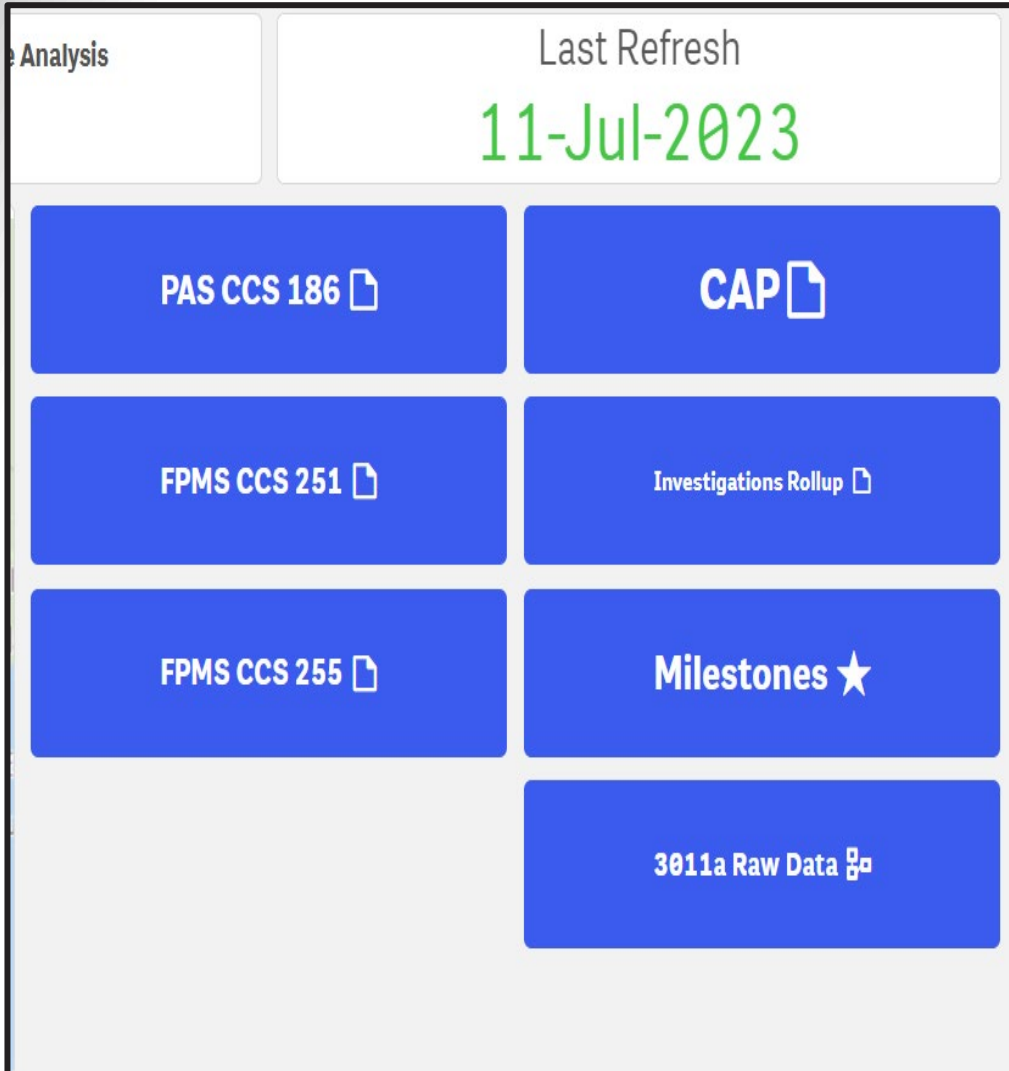

The dashboard screenshot shows a header with 'Analysis' on the left and 'Last Refresh 11-Jul-2023' in the center. Below the header are seven blue data tiles arranged in two columns. The left column contains three tiles: 'PAS CCS 186', 'FPMS CCS 251', and 'FPMS CCS 255'. The right column contains four tiles: 'CAP', 'Investigations Rollup', 'Milestones', and '3011a Raw Data'. Each tile includes a small document icon.

- 3011a –
  - ✚ What we learn from it? See currently what a project has carried in, change in available funding on the project that year, and then available to obligate for the year. Also shows net obligations and the unobligated balance.
- Milestones Report –
  - ✚ What we learn from it? Timing of initial receipt of funds, When expected to be completed, Whether fiscally closed out.

# UTILIZING DASHBOARDS

- Why are these useful? (From Division Perspective)
  - Inquiries to/from the HQ program managers on status of projects
  - Ensuring we're building a good reputation with the HQ Program Managers – i.e., not asking for more money than the districts can spend AND sending back money when we can't spend it or have excess.
  - Inform discussions about district requests and balancing workloads, etc.
  - Better understand what funding districts have available in case we need to move around funds
  - Project prioritization for funding discussions

# UTILIZING DASHBOARDS

The dashboard screenshot shows a header with 'Analysis' on the left and 'Last Refresh 11-Jul-2023' in green text on the right. Below the header are several blue data tiles: 'PAS CCS 186' with a document icon, 'CAP' with a document icon, 'FPMS CCS 251' with a document icon, 'Investigations Rollup' with a document icon, 'FPMS CCS 255' with a document icon, 'Milestones' with a star icon, and '3011a Raw Data' with a grid icon.

- Why are these useful? (From Division Perspective)
  - Inquiries to/from the HQ program managers on status of projects
  - Ensuring we're building a good reputation with the HQ Program Managers – i.e., not asking for more money than the districts can spend AND sending back money when we can't spend it or have excess.
  - Inform discussions about district requests and balancing workloads, etc.
  - Better understand what funding districts have available in case we need to move around funds
  - Project prioritization for funding discussions

**Soon, the Remaining Items Milestones will also be showing quarterly at the DRC meetings which will help us communicate challenges and successes within these program at the highest levels of leadership!**

# COMMUNICATING WITH OUR DISTRICT POCS

- Quarterly Meetings for Remaining Items
  - Program Managers for each program
  - Discuss execution status and other program updates from HQ
  - Use this as an opportunity to collect feedback/questions for HQ
  - **Celebrate execution wins!**

# FPMS BASE PROGRAM SPECIAL STUDY: PROCESS

- Requestor must submit a written request for assistance to the District
- District develops a rough order of magnitude cost and scope
- Districts submit requests via the RI-TACOd database typically in May/June timeframe (MSC will specify due-date)
  - Current required information (beyond POC info): Description of the product, Impact of the product, Non-Federal government entity requesting assistance, start date, end date, location, description of any administration benefits supporting, budget request by month for following FY and amount needed the next FY
- Division completes review and prioritization of all CCS 255 Special Studies in their AOR
- HQ provides funding based on prioritization within funds available
  - Typically funded at beginning of FY (October)
  - Out of cycle requests may be considered as funds available
- Closeout: Will be completed in RI-TACOd database- funds should be returned via coordination with the MSC

# FUTURE FPMS RI-TACOD USES

- Budget requests and management (all sub-programs)
- FPMS IANS proposal submission and review
- FPMS IANS update/close-out (replace Access database)
- New FPMS base program update/close-out module
- Poster templates for both FPMS base program special studies and FPMS interagency nonstructural special studies
- More under consideration? Suggestions welcome!

# PAS TACO-D MODULE

US Army Corps  
of Engineers®

U.S. ARMY

# PAS TACO-D MODULE

- Collecting similar information to existing PAS Database
- Allows for tasking based on roles
- Connection to EDW for live updates to budget information
- Data export for reports
  
- Process will be similar to current process for requesting funds and managing database information
